

How to access your telehealth visit:

- ▶ When scheduling your appointment, you will be asked how you want to access the virtual visit - computer or device. Be sure your choice has access to camera and microphone.

- ▶ Depending on your preference, the provider will send either a text or email link for you to access your visit.
- ▶ Follow the link provided. Type your name and click Check In. Be sure to allow camera/microphone access

The screenshot shows a web form for check-in. At the top, it says "Welcome!". Below that, it asks the user to "Please check in below to let Dr. Vollstedt know you are here". There is a text input field with the placeholder text "Enter your name here". Below the input field is a large, grey "Check In" button.

You will appear in a waiting room on the provider's side of the portal. He or she will start the visit when ready
